

## Environmental Policy

**Viney Plumbing & Building Maintenance is committed to minimise the environmental impacts of our activities on the environment and the health of employees.**

To achieve this aim we are committed to minimise waste of materials, substances and energy

We are also committed to purchase and use materials, substances and equipment that are environmentally friendly and minimise environmental impacts and pollution.

In our office we are committed to recycling of materials and substances and aim to increase the portion of recycling each year

In our projects we identify potential impacts and develop controls to avoid or minimise environmental impacts.

We are dedicated to comply with all regulatory and contractual environmental requirements and set environmental objectives and targets.

We regularly review our activities to bring about better outcomes in our environmental performance complying with all relevant environmental laws and regulations
